CUT OUT · fits both dials

状態 Status

Dial bezel replaces the orange tape: cut out the striped window, then trim to fit your dials. STATUS label goes next to the front LED (add-on).

Instruction card: FRONT
Print at 100%, cut out, glue back-to-back with the next page, then laminate. Mount inside the lid or tie it to the side.

Occupancy knob scale

Print at 100%. Cut out the round scale, punch or drill the center for the knob shaft, and stick it under the knob. Turn the knob fully left (counter-clockwise) and line its pointer up with 0. If your pot turns less or more than about 300°, the scale can be redrawn to match.

人数

About how many people?

This plate replaces the PEOPLE label and the dial bezel from page 1 once the knob is fitted. The scale is sized for the printed 58 mm knob (big_knob.stl): the numbers sit just outside its skirt.
